November 2007

Cardiff

March 2008

Helsinki
October 2008

School visit Helsinki 2008

Edinburgh

April 2009

Letting our hair down at a Scots ceilidh!

Sevilla

October 2009

Bratislava

April 2010

Bratislava 2010 – the brave souls who defied the volcanic ash!

London

October 2010

Brussels

April & Oct 2011, Oct 2012, April 2013

President, Vice President & Secretary at European Parliament 2012

What about Jodie who had a right hemispherectomy?

• Injury-induced Plasticity/Plasticity and Brain Repair

- During brain repair following injury, plastic changes maximize function in spite of the damaged brain.
- In studies involving rats in which one area of the brain was damaged, brain cells surrounding the damaged area underwent changes in their function and shape that allowed them to take on the functions of the damaged cells.
- (Surgery thought not quite as effective) changes occur in human brain following injury.
- Little is a child, which helps her case, but even in adults, the brain has an amazing ability to repair itself!

København

April 2012

Copenhagen 2012

Danish students at ATP conference, Birmingham 2012

ATP conference, Keele University 2013

Berlin

October 2013 & April 2014

*"a worthwhile aim is to promote
EU citizens' psychological literacy
through teaching psychology
people learn the basics of physics and
biology at school but have to learn the
basics of human behaviour by
themselves, often at high personal and
social costs"*

Prof Robert Roe

2011
